TARZANA CAMPUS ONLY

ENCINO CAMPUS ONLY

Subject :	Vacuum Extraction	Effective Date:	4/00
Number :		Supersedes :	8/98
Manual(s) :	Perinatal		
Dept. Head :			
Administration		Page(s) :	1

I. STANDARD

The nurse will provide safe assistance to the physician performing a vacuum extraction.

II. PURPOSE

The indications for a vacuum extraction delivery are the same as with a forceps delivery.

III. POLICY

The policy will be to provide disposable vacuum extraction equipment to the physician and assist in the delivery with the use of a manually operated vacuum extractor pump.

IV. PROCEDURE

- A. Open the sterile vacuum extractor cup and place on the sterile field.
- B. Attach the sterile tubing to the vacuum pump. When manual pumping begins, pressure should be gradually increased to the green zone on the vacuum gauge.
- C. Traction is applied by the physician with the maternal expulsive efforts.
- D. Most deliveries should be accomplished within 15 minutes after the cup is applied.
- E. Most deliveries should be accomplished with 3 pulls and no more than 8.
- F. No more than 3 pop offs are recommended.
- G. Be prepared for a potential shoulder dystocia.
